Date: Tuesday, October 21, 2014 8:31:00 AM

Thanks Earl - looks like you should get it soon. I guess the WAF/\$\$ is in place now?

Thanks,

Gary Miller

Subject: FW: Update on San Jacinto Model Transfer

Hi Gary,

I just received this update from AQ.

Earl

Subject: [EXTERNAL] Update on San Jacinto Model Transfer

Hi Earl - we wanted to drop you a quick note to give you an update on the status of the model transfer. Most of the model files have been compiled and we have modified the batch files used to run the models so that they are not specific to Anchor QEA's systems (hopefully making it easier for you to run on your end). Because of those modifications we are currently working on testing the simulations to make sure we are able to replicate the results presented in the SJR modeling reports and the FS. We are also in the process of updating the model documentation as needed, and developing a short memo that describes what we are sending you and the general procedure for running the models.

Barring any unforeseen issues, we are planning to ship you the files by early next week. We plan to send you the hydrodynamic, sediment transport, and fate models all at the same time.

Feel free to contact me if you have any questions.

Mike
